## FASTER FORWARD

Make sure you have the decisive edge in the battle for every watt: take your racing experience to the next level with the GameChanger 2.0 MIPS.

Because every second counts, less air resistance is a must! This is where the wider rear comes into play, in addition to the aerodynamic shape. The AeroBlade optimises the airflow with a special grid structure and adapts to different speeds, side angles and helmet inclinations. So the GameChanger 2.0 has a solution for every racing situation.

Even on the hottest rides, you can keep a cool head thanks to the AirBoost air inlet and sophisticated ventilation system.

But so that comfort doesn't fall by the wayside, you can conveniently adapt the helmet fit using our patented adjustment system. ActiCage increases the stability of the road helmet.

In the MIPS variant, the Air Node Rotation System softens the rotational forces in the event of a fall and offers greater protection for the brain.

Faster forward with the GameChanger 2.0: tested by professional athletes in the wind tunnel and on the road. Time to get going!

## Technologies

- Lower edge protection: polycarbonate (PC) outer shell covers the lower edge of the helmet and protects against

# GameChanger 2.0 MIPS performance red M

scratches, impacts and signs of wear and tear

- Ponytail Fit: thanks to the opening in the height-adjustable adjustment system, the helmet is also suitable for long hairstyles such as ponytails, buns, or braids
- Eyewear Port at front and rear: recess at the front and rear of the helmet to hold eyewear in a secure and aerodynamic position while riding or during stops
- Acti Cage™: allows larger ventilation openings combined with high stability thanks to foamed-in structural reinforcement
- Aero Blade™: additional component to reinforce the structure and improve aerodynamics
- Mips padding: low-friction shell attached to the inside of the padding to counteract rotational forces in the event of a fall – does not interfere with the ventilation system and is characterised by its low weight
- Forced Air Cooling: the ventilation openings are connected to each other via channels on the inside to guide incoming air through the helmet and thus ensure maximum air circulation and a pleasant head climate
- Zoom™ Spin adjustment system: rotary wheel at the back of the head for individual adjustment of the helmet to the head size
- Stitched straps: for optimum aerodynamics, the straps are sewn and therefore do not require any strap dividers – this means they fit particularly snugly and do not flap while riding
- Comfort Pads: soft padded inserts for optimum comfort, attached to the helmet with Velcro
- Removable, washable pads: can be removed and washed by hand or replaced if necessary
- Flow Straps™ Pro: aerodynamic straps for low flow resistance, less noise and high wear comfort – the upper section is slightly thinner to minimise the contact surface on the skin
- Magnetic buckle: the straps are fitted with a high-quality, magnetic FIDLOCK buckle to enable the chin buckle to be opened with one hand, even when wearing gloves
- In-mould process: production process in which the inner cushioning material made of expanded polystyrene (EPS) is foamed directly into the outer shell made of polycarbonate (PC) – this creates a durable and robust connection

## Technical data - GameChanger 2.0 MIPS performance red M

Finish	shiny
Head size	54-58 cm
Peak	No
Size	M
Visor	No
Weight	290 g
backlight	No
color of facets	red
design color	performance red
EAN	4003318980367
