

Glueing Gauge for active Glassbreak detector

Art.-Nr. AZZU10151

Seite 1 von 1

Gluing gauge for gluing the glassbreak sensors. The gauge is designed to ensure the distance from the sensor to the window frame. Furthermore, the gauge ensures constant pressure on the sensors during the curing process of the adhesive.

Technologies

- For the optimal placement of the glassbreak sensors
- Ensures constant pressure on the sensors during the curing process

Technical data - Glueing Gauge for active Glassbreak detector

Dimensions	120 x 90 x 30 mm
Gross weight	0,26 kg
Height	25 mm
Length	90 mm
Net weight	0,25 kg
PSTI conformity required	No
Width	120 mm
