GRANIT™ Super Extreme 2500/165HB230

CORDLESS ANGLE GRINDERS BITE ON GRANITE HERE

If you love your e-bike, cargo bike or your bike in general, you want to protect it in the best possible way - also against attempts to steal it with battery angle grinders.

When developing the GRANIT™ Super Extreme 2500, great attention was paid to ensuring the best possible resistance to attacks with battery angle grinders as this method of breaking open bike locks is increasingly observed in large cities. Our special wolfram carbide material compound around the lock shackle and body is the answer to this phenomenon and makes it extra hard for thieves. The shackle, housing and structural parts of the lock are made of hardened steel.

The extremely robust U-lock in "Made in Germany" quality thus secures bikes against brutal theft attempts. With the ABUS XPlus™ cylinder, it offers additional protection against skilled lock breaking methods such as picking.

The USH 2500 lock holder is easy to attach to the wheel: plastic-coated metal tensioning straps and optional screw holes ensure flexibility. To prevent the lock from rattling when riding, it is fixed in the USH 2500 with both ends of the shackle.

The large closing range of the shackle means that numerous connection options can be found quickly and easily. In contrast, thieves have a hard time with this robust bike lock because even cordless angle grinders bite on granite here.

GRANIT™ Super Extreme 2500/165HB230

- 13 mm steel shackle with additional tungsten carbide armor
- The lock shackle and body are better protected against brutal saw attacks with battery angle grinders thanks to a special wolfram carbide material compound
- Double locking of the shackle in the lock body
- The shackle, housing and structural parts of the locking mechanism are made of specially hardened steel
- ABUS XPlus™ cylinder for extremely high protection against manipulation, e.g. picking
- ABUS Power Cell technology offers maximum protection against impacts and attempts to break open the lock
- Two keys included in the scope of delivery
- ABUS Code Card for spare and replacement keys
- Flexible and firm holder fixation with coated metal fixing straps

Operation and use

- Recommended for securing high-value two-wheelers (bicycle, e-bike, cargo bike, etc.)
- Very good protection for high theft risk
- Specially developed against brutal attack methods with an cordless angle grinder

Technical data - GRANIT™ Super Extreme 2500/165HB230

Height	230 mm
Locking type	key
Weight	2230 g
Width	102 mm
alarm function	No
color of facets	black
diameter	28 mm
type of cylinder	XPlus cylinder
EAN	4003318996801
