LOXERIS™ One white

BRINGS CONVENIENCE TO YOUR DOOR

The wonderful feeling of being at home starts at your front door, because the LOXERIS One smart door lock drive makes coming home easier and more convenient: one touch opens the door for you.

Sometimes getting your key out is a cumbersome process, but your smartphone or smartwatch is quickly at hand. So why not use an app instead of the key?

This is how you gain real convenience at your front door with the LOXERIS One:ulliOpen and close your front door with one click in the intuitive ABUS One app./liliOptionally use our separately available numeric keypad, finger scanner or remote control./liliShare permanent or temporary access with family and friends or with employees and service providers./liliKeep track of who is using your LOXERIS One and when with the event log./liliBenefit from the security of proven ABUS SmartX™ technology to secure Bluetooth® communication between the app and LOXERIS One./liliUse the separately available BRIDGE One to control your LOXERIS One remotely and integrate it into your smart home - with the benefits of voice assistants, scenarios and routines./li/ulInstallation on the inside of the door is simple and can be done quickly without installing cables; all you have to do is give up a key that remains in the door lock drive. The key head is sawn off for installation so that your keys are compatible with the LOXERIS One regardless of their head shape.

Setting up the app is simple and takes just a few steps. From now on, arriving home is both smart and convenient.

Technologies

- High security thanks to ABUS SmartX™ technology, AES 128-bit encryption and ABUS Keycard for admin authentication

Subject to technical modifications. We assume no liability for mistakes and printing errors. © ABUS 10/2026

LOXERIS™ One white

- Simple and wireless installation, fast and uncomplicated start-up with the free ABUS One app – one key must remain in the door lock drive
- Power supply via replaceable batteries (4 x AA batteries are included)
- Suitable for Euro profile cylinders according to DIN 18252 and DIN EN 1303 with emergency feature

Operation and use

- Bluetooth® door lock drive for front doors – is fitted on the inside of the door
- Smart opening and closing of the front door or flat door by app
- Simple operation with the ABUS One app on a smartphone or smartwatch – optionally also by code input, finger scan or remote control
- Send access authorisations for up to 28 users and restrict them in terms of time or share permanent access
- Automatic locking of the door at predetermined times – regardless of whether the door is to be locked at night after returning home or in the morning after leaving the house
- Lock&Go function locks the door a few seconds after leaving the house or flat at the touch of a button
- Real-time remote access to all functions such as opening, locking, viewing event logs and managing access authorisations as well as optional integration into smart homes via the separately available BRIDGE One
