

Also for larger circuit breakers, circuit protectors and disconnectors with 480/600 V:

Electricians secure themselves and others against unintentional or unauthorised restarting during maintenance work.

E211 encloses the switch and prevents access by unauthorised persons by hooking in a padlock. The switch cannot be operated again until the padlock is removed.

Technologies

- Polyamide, partly glass fibre reinforced: durable, resistant, non-conductive
- Easy to use with screw mechanism for safe (tool-free) mounting
- With enclosed adapter for flat fuses

Operation and use

- Fuse protection for circuit breakers during maintenance work
- Use without tools, simply attach and tighten with the hand wheel
- For hanging a padlock with a shackle diameter of up to 7 mm
- With adapter piece for better fixation

Technical data - E211

Weight	55 g
colour	red
