BUSINESS CARD HOLDER: IDENTITY AT A GLANCE

With our ID card holder for our Spector, Spector-E, Scator and Scator-E safety helmets, business cards or ID cards can be securely and visibly attached to the helmet.

The business card holder is attached to the front of the safety helmet in a specially designed slot. Attached there, it enables quick identification on the construction site or in the factory. The business card holder, which also protects the user ID card from rain, is ideal for increased security and efficient communication in everyday working life.
