

SOFT SHELL, HARD CORE

The IVEN 8220 Cable Lock deters bicycle thieves while its innovative plastic coating protects your bike's paintwork.

The Cable Lock IVEN 8220 is obviously robust: the high-quality steel cable, which is coated with a highly flexible Ivy synthetic sleeve to prevent damage to the bike's paintwork, is 22mm thick. The best part: the functional high-tech fibre is particularly durable, water resistant and weather resistant. Combined with the body and structural parts of the locking mechanism made of specially hardened steel, the Cable Lock IVEN 8220 scores on "hard facts" and acts as a deterrent for potential bicycle thieves.

Technologies

- 22 mm thick, high-quality steel cable
- New, functional, durable and highly flexible Ivy synthetic-fibre coating to prevent damage to the paintwork
- The body and structural parts of the locking mechanism are manufactured using specially hardened steel

Operation and use

- Great protection where there is a low risk of theft
- Recommended for the protection of good-quality bicycles
- The longer the chain, the easier it is to lock the bicycle to a fixed object

Tips

- Cable locks are characterised by good flexibility and relatively low weight
 - The particularly thick cable acts as an additional deterrent
