

Time2Close™ window alarm with timer

Seite 1 von 2

REMINDS, PROTECTS, SECURES

With the compact Time2Close window alarm, forgetting open windows or doors is a thing of the past. Effectively prevent heat loss from heated rooms or potential water damage in the event of a sudden storm.

The alarm can be used in a variety of ways - for example, on refrigerators to prevent energy loss or on cupboards to prevent unnoticed access. Select a timer with a duration of 5, 10 or 15 minutes and open or tilt the window. After the set time has elapsed, a rising alarm tone reminds you to close the window. Or activate the optional 115 dB(A) burglar alarm, which immediately attracts attention when the window or door is opened and effectively deters burglars. Operation is by pressing the buttons on the alarm unit. A short acoustic tone and LED light signals confirm the selected mode.

Installation is extremely simple: no drilling or cables, just an adhesive surface - also ideal for rental properties, as window frames are not damaged. The exchangeable, commercially available AAA batteries, which can also be replaced by rechargeable batteries if required, offer additional flexibility for operation. Made from UV-resistant plastic, the device remains free from yellowing even after prolonged exposure to intense sunlight.

Please note: The window alarm is only suitable for indoor use.

Important: Only one function can be used at a time - either the timer, which issues an acoustic reminder after 5, 10 or 15 minutes, or the burglar alarm.

Technologies

Time2Close™ window alarm with timer

Seite 2 von 2

- The set includes an alarm unit and a magnetic sensor as well as suitable batteries
- The volume is around 115 dB(A) at the device and 85 dB(A) at a distance of one metre.
- Three countdown alarm options (5, 10 or 15 minutes)
- Optional burglar alarm
- Only one function can be used at a time (either timer or burglar alarm) – not both at the same time
- Adhesive bonding without damaging the window (also suitable for rental properties)
- Once a function has been saved (e.g. the 5-minute countdown alarm), it is activated each time upon opening until another function is selected
- UV-resistant plastic (does not yellow)
- 2 x AAA batteries included (approx. 2 years running time)
- Dimensions: 43 mm x 85 mm x 15 mm (W x H x D)
- The activation mechanism is controlled by a magnet
- An LED for visual confirmation of the function and mode selection, supplemented by an acoustic tone

Operation and use

- Acoustic reminder of open windows or doors with three selectable timers of 5, 10 or 15 minutes
- Also has an optional alarm that provides an acoustic warning in the event of a break-in
- Suitable for simple installation on windows, cellar doors, all interior doors and for additional security on cupboards to effectively prevent unnoticed access.
- Suitable for private use, such as in houses and flats
- Only suitable for indoor use
