## TELESCOPIC CEILING MOUNT (60 - 102 cm)

Get your cameras perfectly positioned!

This ceiling mount is a robust and durable solution for mounting a camera indoors or outdoors. The aluminum construction ensures high stability and, with its discreet white color, blends seamlessly into any environment. With the compact mounting plate (diameter 109 mm), the mount is securely and space-savily attached to the ceiling. The extendable mount can be adjusted in height from 60 cm to 102 cm. This allows the position and distance of the camera from the ceiling to be adjusted to suit the individual mounting situation. The cable guide integrated into the bracket ensures a clean and professional installation, including optimal protection of the connection cable against moisture, damage, or tampering. The ceiling bracket is an optional accessory for various camera installation boxes from the ABUS portfolio. Please note the load capacity of up to 4.5 kg.
