Your home is always with you

Ward off intruders, prevent damage caused by natural hazards, control access: With the free app, you can set up your Smartvest Pro wireless alarm system, wirelessly control all of the devices connected to the system and keep on eye on your home at all times.

A modern wireless alarm system for your own four walls, for reacting quickly in an emergency, even when you're away from home - the Smartvest Pro app is there for you. Whether it's on your smartphone or your tablet, the free app is the security system's heart. Use the Smartvest Pro app to program compatible devices, configure useful scenarios and stay on top of your home's security. Even users with no prior knowledge will be able to quickly find their way around.

The biggest advantage comes in everyday life, when you and the rest of you household are out and about: with push notifications, you'll never miss an intruder alarm - whether it's triggered by a magnetic contact on the door, a vibration detector on the window glass or a motion detector in the hallway. The same applies to danger detectors: if, say, the smoke detector goes off in the event of a fire, a push notification will be sent to you immediately so you can call the fire brigade right away.

The Smartvest Pro app is always by your side on your smartphone or tablet. For a comfortably secure home. For you and your family.

Technologies

- Central and free control panel for the Smartvest Pro wireless alarm system: integrate and control all compatible devices via the Smartvest Pro app, e.g. activate intruder alarms and access memory/event list (no subscription required)
- High security level for daily use
- Family-friendly multi-user concept (and with regard to language settings): different permissions can be selected for multiple users, such as for parents and children
- Immediate push notifications sent to individual or all users when an intruder, panic or fire alarm is triggered or in the event of impending water damage (in combination with the corresponding Smartvest Pro detectors on site)

-
- Individual settings for quick access to important functions right from the home screen: e.g. panic alarm and start camera recording
 - Integrate practical everyday scenarios: "if/then" dependencies that run automatically, e.g. "if door is closed, then light is on" in combination with the magnetic contact, the wireless socket and a standard floor lamp
 - Always up to date: Home screen with news feed (e.g. low battery indicator), including links to articles such as instructions on changing the battery
 - Multiple control panels per app/user account can be configured
 - Step-by-step instructions and comprehensive tips can be accessed in the app itself
-
