

SMALL. CLEVER. TRAVELGUARD.

Whether on a city trip, bikepacking tour or construction site - the Combiflex TravelGuard 70 is your ultralight safety upgrade for in between.

With a locking circumference of up to 72 cm and a robust steel core, you can protect helmets, luggage, pushchairs or sports equipment from opportunist theft.

As simple as a cable tie, but safer: the integrated safety button prevents accidental tightening or crushing - simply press and hold to adjust the loop. Thanks to the 3-digit number code, you can secure your property without a key. Compact and lightweight, this lock fits in any pocket - and is always ready for use.

Technologies

- Compact design: at just 106 grams, the 4 mm thick and 76 cm long special lock is very light and easy to stow away – whether in a jersey or jacket pocket, rucksack or handbag
- Practical and flexible: works as easily as a cable tie and offers plenty of room for manoeuvre when securing to an object thanks to 72 cm locking circumference
- Locking type: 3-digit numerical code cylinder lock with 1,000 possible code combinations
- Release button: safety button to prevent accidental tightening or crush injuries – simply press and hold the button to tighten or loosen the loop
- Robust and weatherproof: rustproof cable lock with extra solid steel core
- Gentle on paintwork: the steel core is coated to protect against scratches
