AirBreaker 2.0 MIPS graphite silver M

RIDE ALL IN

When every second counts, you need a helmet that will get you to the front. The AirBreaker 2.0 is made for top performance: an ultra-light road helmet with optimised ventilation, a sleek design and a comfortable fit.

Maximum performance - Low weight Its low weight is just the beginning, because innovative features make the AirBreaker 2.0 an exceptional performance helmet: the lightweight Aero Blade™ at the upper rear end brings aerodynamics to the road by reducing drag and increasing airflow. Made from material with injected carbon fibres, it provides stability without adding weight. The foamed-in Acti Cage™ structure provides additional robustness and protects your head without compromising on ventilation. Improved ventilation - Dynamic design With large, strategically placed air openings and optimised Forced Air Cooling, your head stays pleasantly cool even during the hottest races - whether flat out in a sprint or on long, slow climbs. Even with sunglasses fitted, you can feel the full, refreshing ventilation. Developed together with professional athletes, the racing bike helmet continues the dynamic, sporty design language of its predecessor with even more precise lines. Feel the speed - Enjoy the comfort

The AirBreaker 2.0 also impresses with a perfect fit: supported by a smooth adjustment system for the perfect setting.

Put it on, adjust it precisely and focus on your ride. Where the limit ends is where you really start.

Technologies

- Aero Blade™ with Injected Carbon: additional component to reinforce the structure and improve aerodynamics – thanks to the material reinforced with carbon fibres, it is particularly sturdy and lightweight at the same time
- Acti Cage™: allows larger ventilation openings combined with high stability thanks to foamed-in structural

reinforcement
- Forced Air Cooling: the ventilation openings are connected to each other via channels on the inside to guide incoming air through the helmet and thus ensure maximum air circulation and a pleasant head climate
- Lower edge protection: polycarbonate (PC) outer shell covers the lower edge of the helmet and protects against scratches, impacts and signs of wear and tear
- Zoom™ Spin adjustment system: rotary wheel at the back of the head for individual adjustment of the helmet to the head size
- Ponytail Fit: thanks to the opening in the height-adjustable adjustment system, the helmet is also suitable for long hairstyles such as ponytails, buns, or braids
- Front Eyewear Port: defined recess on the front of the helmet to position glasses in a secure and aerodynamic holding position while riding
- Floating Pad: padding on the inside of the helmet, which is clicked into place via several attachment points, making it more flexible and offering better ventilation and greater wear comfort
- Removable, washable pads: can be removed and washed by hand or replaced if necessary
- Flow Straps™ Pro: aerodynamic straps for low flow resistance, less noise and high wear comfort – the upper section is slightly thinner to minimise the contact surface on the skin
- Stitched straps: for optimum aerodynamics, the straps are sewn and therefore do not require any strap dividers – this means they fit particularly snugly and do not flap while riding
- In-mould process: production process in which the inner cushioning material made of expanded polystyrene (EPS) is foamed directly into the outer shell made of polycarbonate (PC) – this creates a durable and robust connection
- Magnetic buckle: the straps are fitted with a high-quality, magnetic FIDLOCK buckle to enable the chin buckle to be opened with one hand, even when wearing gloves
- Mips padding: low-friction shell attached to the inside of the padding to counteract rotational forces in the event of a fall – does not interfere with the ventilation system and is characterised by its low weight

Technical data - AirBreaker 2.0 MIPS graphite silver M

Chin buckle	Magnetic buckle
Eyewear Port	Front
Finish	shiny
Forced Air Cooling	Yes
Head size	54-58 cm
Headring	Half ring
Helmet type	Road helmet
Lower edge	Yes
Mips	Yes
Peak	No
Ponytail Fit	Yes
Removable pads	Yes
Size	M
