

SAFELY UNDER LOCK AND SHACKLE

The 16 mm thick, double-bolted square parabolic shackle of the ABUS GRANIT™ Extreme 59 provides reliable protection and makes life hard for thieves.

The shackle and other security-relevant parts are made of hardened special steel. The ABUS XPlus cylinder additionally increases security against tampering attempts such as picking.

The U-lock is very flexible when it comes to transportation and can be attached to tubes with a diameter of 12-17 mm using the SH 59 bracket. Or you can use the M6M Monolock adapter plate from GIVI as a fully-integrated mounting option.

Technologies

- 16 mm square parabolic shackle (19 mm with coating)
- Double-locking mechanism securing the shackle in the lock body
- The shackle, the lock body and the structural parts of the locking mechanism are manufactured using specially hardened steel
- ABUS XPlus cylinder for exceptionally high protection against manipulation attempts such as picking
- Two keys are included in the scope of delivery
- Manual cover to protect the keyhole from dirt and corrosion
- ABUS Code Card for additional and replacement keys

Operation and use

GRANIT™ Extreme XPlus™ 59/180HB310

Seite 2 von 2

- Excellent protection where the risk of theft is high
- Recommended for protecting high-value bicycles and motorbikes

Tips

- You can order several one-key-fits-all locks. That means that a single key or mechanism can be used for several locks
- U-locks are one of the most difficult lock types to defeat
- The security of your motorbike can be considerably increased by using a connection point (e.g. chain)
