Windows and doors closed?

With the SENSOR One opening detector, you can see directly whether the door, window or flap is closed or open - just take a look at the ABUS One app and you'll know for sure.

If you activate push notifications, you will also receive a message on your smartphone as soon as the children come home and open the door, for example. Smart accessories for smart drives In combination with smart ABUS One door lock drives and window drives, the SENSOR One opens up further possibilities. Two examples: olliRemote locking: Before the LOXERIS One locks a door, the opening detector checks whether it is open - and thus prevents any incorrect locking. Automatic locking: The LOXERIS One can be set so that it always locks the front door automatically as soon as the SENSOR One reports that the door is closed. Quick installation, easy integration

The SENSOR One can be mounted using either screws or the supplied adhesive pads. The ABUS One app provides step-by-step instructions for mounting and installation in the app.

Important: The SENSOR One only works in conjunction with a BRIDGE One and the ABUS One app- regardless of whether the opening detector is used individually or combined with smart drives.

---

## Technologies

- Opening detector with magnetic sensor technology: for reliable detection of the opening and closing status of doors, windows, flaps, etc.
- Clear status display in the ABUS One app: see at a glance whether the door or window is closed – also remotely
- Directly informed: with optional push notification when the status changes (e.g. door opens)

# SENSOR One silver

Seite 2 von 2

- Prevents incorrect locking by smart drives: by checking the opening status of the door or window before locking when combined with smart ABUS One drives (LOXERIS One , WINTECTO One)
- Automatic locking: by the LOXERIS One when the door is closed (can be set optionally)
- Simple adhesive mounting on smooth surfaces: thanks to the adhesive pads included in the scope of delivery; screws are included if screw mounting is preferred on uneven surfaces or wooden doors for permanent secure attachment, for example
- Power supply: via replaceable battery (1/2AA 3.6 V)
- Available in three colours: so that the opening detector matches the door or window – white, black, silver
- Smart home-capable: the status of the SENSOR One can be queried via the Alexa and Google Home smart home systems
- Important: the SENSOR One can only be used in conjunction with BRIDGE One and the ABUS One app
- High security thanks to ABUS SmartX™ technology, AES 128-bit encryption and ABUS Keycard for admin authentication
- Made in Germany

## Operation and use

- Opening detectors for house and flat doors, for windows and patio doors
- Can also be used on cat flaps, dog flaps and other access points – in weather-protected areas also suitable for parcel boxes
- Works as a stand-alone product or as an accessory for smart ABUS One drives
- Flexible mounting with screws or adhesive pads – detector and magnet are mounted on the door frame and leaf
- Control on the move via smartphone in the ABUS One app
- SENSOR One only works in conjunction with the BRIDGE One
- For indoor use

## Technical data - SENSOR One silver

ABUS One App	Yes
Battery - quantity	1
Battery – Type	ER14250
Bluetooth	Yes
Bluetooth standard	BLE 5.1
Radio frequency	2400 MHz
Weight	40 g
Wi-Fi	No
alarm function	No
colour	silver
EAN	4003318444982
