Bracket SH 5800K

A SMART HOLDER FOR YOUR BORDO

With the SH 5800K, you can transport your BORDO™ 5800K safely, in a space-saving manner and always ready to hand directly on your bike.

Simply fit the practical holder with fixing straps using an Allen key. Thanks to the holes positioned low down, the holder also fits bikes with a bottle holder mount close to the bottom bracket. Particularly convenient: the lock is removed from the front. As a result, the holder requires little space on the bike and can be flexibly mounted even on narrow frame shapes.

The BORDO™ 5800K sits securely and rattle-free in the holder, while the clever design allows quick access for everyday use. Practical, compact and perfectly matched to your BORDO™ 5800K.

Technologies

- Holder secured by fixing strap: easy installation with fixing strap and 3 mm Allen key
- Front removal: less space required on the frame due to lock that can be removed from the front
- Holes located low down: enables installation even with bottle holder mounts close to the bottom bracket
- Rattle-free transport: secure fastening keeps the BORDO™ 5800K stable while riding
- Customised design: specially adapted to the BORDO™ 5800K for a secure fit and convenient handling

Operation and use

- Easy transport: secure and rattle-free mounting of the BORDO™ 5800K directly on the bike
- Ideal for small frame geometries: space-saving design enables installation even with narrow frame shapes
