

# Rear Light MultiPlayer, MoRaine, LOWK-Y

Seite 1 von 2

COMPACT. VISIBLE. READY FOR USE.

Simply clip on, directly visible: this rechargeable rear light is attached to the rear of the helmet and ensures safety in everyday life.

The compact light is quick and easy to install. Two light modes - Steady or Flash - offer you the right setting for every situation. The continuous light mode ensures uniform visibility, while the flashing light attracts additional attention in road traffic.

With an operating time of at least 6.5 hours in Steady mode and up to 10.5 hours in Flash mode, you can stay visible on the move for a long time. Thanks to protection class IP44, the rear light is protected against splashing water and small foreign objects and is therefore ready for use even in changing weather conditions. The battery is fully charged again in around an hour via USB-C.

## Technologies

- Rechargeable, clip-on rear light: attaches to the back of the helmet and ensures greater visibility – can be charged using a USB-C charging cable
- IP44: protection class that certifies protection against solid foreign bodies larger than 1 mm and against splash water for electronic products such as lights
- Two different light modes: Steady for continuous light and Flash for brightly flashing light in at short intervals
- Operating time per mode in h (min.): depending on the weather conditions and type of use, the available usage time of the light is at least 6.5 hours in continuous mode and in flashing mode at least 10.5 hours
- Battery charging time (light): the charging time until the battery is fully charged is approximately 1 hour

## Technical data - Rear Light MultiPlayer, MoRaine, LOWK-Y
