RC One

Comfort at the press of a button

The RC One Bluetooth® remote control is the hand-held transmitter that allows you to control almost all ABUS One products: from alarm-protected bike locks and smart window drives for patio doors to door lock drives for your front door or flat entrance. With an RC One, you can operate several products at once.

The advantages are obvious: the remote control is small, easy to use and - thanks to SmartX technology - also secure. With it you can enjoy the convenience of keyless access without always having to use your smartphone.

This is extremely practical if you don't want to take your mobile phone with you or have to first dig it out of your bag - whether you're at the front door or unlocking your motorbike lock after a quick coffee break. With the Easy Access function, you can even leave the remote control in your bag.

The RC One is also useful when sharing access permissions: family, friends and other authorised people don't need a smartphone or an app: the RC One is enough. And if you ever lose it, you won't have to replace the lock. Simply unpair the remote control in the app and connect a new one. Simple, clever, secure.

Technologies

- Compatible with almost all ABUS One locks and drives: with the exception of the early generations (V1) of the BORDO™ 6500 One, SmartX 770A and Detecto One, as well as the BRIDGE One
- High level of security: thanks to ABUS SmartX™ technology, AES 128-bit encryption and the ABUS Keycard for owner authentication
- Bluetooth® wireless standard: for communication between RC One, the app and ABUS One products
- Quick set-up in the ABUS One app: with intuitive guidance and tutorials for assembly and installation of ABUS One products
- Activate, open or close 27 products at the press of a button: single and double clicks can be assigned to different

Subject to technical modifications. We assume no liability for mistakes and printing errors. © ABUS 11/2026

products – if multiple products are assigned to the same action, the product that responds first to the Bluetooth® signal is activated
- Activate or open an unlimited number of products using the Easy Access function: Approach the lock or drive with the remote control in your bag, wake the product up if required and open – optional feature for added convenience
- Backwards compatible with HomeTec Pro products: when used with the ABUS One app
- Multi-coloured LED: for clear status display and immediate feedback when a button is pressed
- Power supply by battery: 1 × CR2032 (included in the scope of delivery)

Operation and use

- Open and close at the press of a button: with an unlock button for all ABUS One locks – and an additional button for automatic locking by electronic drives such as LOXERIS One and WINTECTO One
- Access permissions can be limited to specific time periods and withdrawn if necessary

Technical data - RC One
