Centuro 860/85 + bracket QuickSnap RBU

THE DUO FOR TWICE THE SECURITY

With twice the protection in the form of a robust steel cable and an overlapping steel sleeve, this ABUS Coil Cable Lock provides twice the security.

This ABUS bike lock makes stealing exceptionally difficult for bicycle thieves. The Steel-O-Flex™ Centuro 860 Coil Cable Lock comprises 20mm-thick, overlapping steel sleeves made of specially hardened steel which cover the steel cable inside, thereby providing double the security. It is therefore considerably more difficult to sever that cable than one in a simple cable lock. We particularly recommend using the Steel-O-Flex™ Centuro 860 to secure high-quality bikes and as protection in areas with a medium risk of theft.

Technologies

- Overlapping steel sleeves with a diameter of 20 mm protect the steel cable inside
- Plastic coating to prevent damage to the bicycle's paintwork
- The steel shells, the case as well as supporting elements of the locking mechanism are made of specially hardened steel

Operation and use

- Good protection at medium theft risk
- Recommended for securing good bicycles
- The longer the cable, the easier the bicycle can be locked to a fixed object

Tips

- Due to the steel shells, the Steel-O-Flex™ locks reach a significantly higher security than common cable locks, yet
