

KKT512 for flat entrance doors in F2: Anodized silver (Door handle on both sides)

Seite 1 von 2

UNIVERSAL AND SAFE

Protect your flat door against burglars with this door fitting.

On flat doors, the door cylinder often protrudes slightly. A weak point that burglars exploit to break into homes without permission. Your flat door can also fall victim to this method. Unless you secure them with a reliable door fitting. This compact door hardware is suitable for universal use on flat doors with a door thickness of 37 to 47 millimetres, regardless of whether they are right-hand or left-hand closing. The layered construction of several steel plates makes it particularly safe. A steel insert in the handle provides high tear-off protection. Hardened and tempered special screws and extra-long steel cams secure against violent break-off attempts.

Technologies

- Certified according to DIN EN 1906 SK 2 and DIN 18 257 ES, VdS approved
- Short cover plate
- Maximum resistance due to the layer construction: several bottom plates for maximum protection
- High impact resistance: extra long steel cams, complete with tempered special screws
- An additional steel inset provides extra strong leverage/tear-off resistance
- Grip plate adjustable to DIN left and right doors
- Spacing: 72 mm, square bolt: 8 mm

Operation and use

- For apartment doors
- Suitable for rebated and flush doors, left and right opening

KKT512 for flat entrance doors in F2: Anodized silver (Door handle on both sides)
