

ELECTRIC AND SAFE

The demands on an electric door opener are high. It must be easy to use and safe. This door opener will satisfy you.

Electric door openers are a convenient purchase for apartment buildings and businesses. They can be opened easily at the touch of a button. But they must also be secure and able to deny access to unauthorised persons. This electric door opener combines ease of use and safety. It can be easily aligned with the latch of the mortice lock used, is easy to mount and has a break-open strength of 3,000 Newton, which corresponds to over 300 kilograms. It can also be used universally for DIN right and DIN left doors.

Technologies

- Rated voltage 8 - 14 Volts, suitable for AC/DC
- Standard version with latch adjustment
- Power consumption: 0,7 A bei 12 V AC
- Electric resistance: 12 Ω bei 12 V AC
- Resistance against attacks 3.000 N

Operation and use

- Universally suitable for DIN right and left doors

Technical data - ET50

Weight	196 g
colour	black
EAN	4003318215308
