

UNIVERSALLY USABLE

This door opener can be operated at the touch of a button and is versatile.

Whether apartment building, commercial property or company building. If you do not have direct access to the front door, you can resort to an electric door opener. However, it must be uncomplicated to use and safe at the same time. This opener meets these criteria. Its latch can be easily aligned with the latch of the mortice lock used and it can be used universally for DIN right and DIN left doors. It safely withstands a resistance of over 300 kilograms.

Technologies

- Rated voltage 8 - 14 Volts, suitable for AC/DC
- With latch adjustment and mechanical unlocking
- Power consumption: 0,7 A bei 12 V AC
- Electric resistance: 12 Ω bei 12 V AC
- Resistance against attacks 3.000 N

Operation and use

- Universally suitable for DIN right and left doors
-

Technical data - ET60

Weight	200 g
colour	black
EAN	4003318215322
