

FOR NARROW PROFILE

Secure your front doors with a narrow profile with this additional door lock.

You want to lock your front doors securely, but still always know who is standing in front of them? This additional lock can be your security solution. Especially if it is a narrow frame profile. The lock has a strong wall anchor by heavy-duty dowels and a strong oval bolt that reliably protects against attempted break-ins. In addition, a rim cylinder V356 with ABUS Pfaffenhain is installed. The lock's hardened door guard allows your door to be opened ajar. Particularly practical for receiving post, for example. The rotary knob on the inside also ensures a quick escape route. The lock is locked from the outside with a key.

Technologies

- Solid extra narrow construction
- Solid wall anchor: concealed fastening
- Backset: 45 mm
- Heavy duty double locking deadbolt: locks with two turns of the key
- Hardened door guard to restrict door opening
- With external Zylinder ABUS Pfaffenhain
- Optional accessories: PZS 80 armoured plate to optimally protect the door cylinder
- Incl. three keys

Operation and use

- Rim Lock for entrance doors with narrow frames

7530 silver
