

AGAINST LOUD BANGING

Lightweight interior doors can be protected from sudden slamming with this door closer.

Just a gust of wind is enough to make your internal doors slam loudly. This is annoying and also not good for the door itself. You can protect lightweight interior doors from slamming shut with this door closer. The closer is suitable for interior doors weighing up to 40 kilograms. It can be conveniently attached without drilling and can be fitted to both DIN-left and DIN-right doors.

Technologies

- Suitable for a door weight of up to maximum 40 kg
- Can be used DIN left and DIN right
- Easy assembly without drilling

Operation and use

- For lightweight room doors up to 40 kg
