

Metal door and stair gate JC9330 FINN

Seite 1 von 2

STAIRCASE TRIP HAZARD

FINN stair gates reliably secure stairways!

Playing tag or just romping around and running through all the rooms - of course, this works especially well on the upper floors. Mount stair gates FINN at the stairways and protect your little tomboy from unintentionally going down a few steps. Extra Tip: With the stair gate extension LOU you can widen FINN a good bit more.

Technologies

- Recommended minimum distance between door and stair gate and wall/stair posts: Minimum 12 millimetres, maximum distance: 62 millimetres
- Accessories for installing on stairs and wall: available separately
- Tested according to: DIN1930:2011
- Can be extended variably and several times by 8.5 centimetres on each side with stair gate extension JC9308 LOU
- Distance between the bars: approx. 55 mm

Operation and use

- For internal doors and staircases
