PROTECTION IN THE DARK

Our MIKE pushchair reflectors ensure your safety on the road!

You know it yourself: In difficult lighting conditions, especially in autumn and winter or when it is raining or snowing, visibility is often severely restricted.

Our MIKE square pushchair reflectors ensure that you and your child are seen in good time, even in the dark. Thanks to the Velcro fastening system, the reflectors can be easily stuck on and thus provide protection in road traffic on prams, bicycles, winter jackets, windbreakers, dog leashes and anything else that needs to be visible.

They are cleaned by hand washing.

Technologies

- Scope of delivery: 2 x reflectors, 12 x 12 centimetres
- Reflector visibility: approx. 150 metres
- Velcro fastener: Fitting is child's play
- Cleaning: Hand wash

Operation and use

- Increased visibility in road traffic in the dark, twilight and poor visibility conditions
- For buggies, bicycles, dog leads and more
