

Protection from poisoning

Gas detector for timely warning of gas explosions and poisoning.

If you use natural gas in your home, you should take safety measures to protect yourself and your family from gas explosions or poisoning. Be warned in time - by our gas detector GWM100ME. With its service life of five years, the sensor inside reliably detects whether there is any gas development. The product is tested and certified according to EN50194-1:2009. It has also been awarded the BSI Kitemark™, a quality mark for security.

Technologies

- Tested and certified according to EN50194-1:2009
- Power supply: AC 220–240 V, 50 Hz/60 Hz
- Power consumption: < 4 W
- Dimensions: 115 x 75 x 36.5 mm
- Operating temperature: -10°C to +40°C
- Humidity: 0–95% rh
- Lifetime: 5 years
- Mute function
- Signal for end of lifespan
- The BSI Kitemark™ is a mark of quality and security
