

SECURE CONTAINERS IN THE BEST POSSIBLE WAY

Tyres, complete wheels, pyrotechnics, tools and machinery are high-value goods that are stored in containers and require good security. The ConHasp GRANIT 215 is the first choice when it comes to protecting high-value assets.

The ConHasp hasp is made of hardened steel and is manufactured using a special welding process. All parts are corrosion-protected. The use of two solid bolts to fasten the container lock to the container creates a particularly robust connection. Container lock + padlock Together with the GRANIT 37RK/70HB100 padlock, containers can be securely locked. Whether keyed alike or keyed to differ or ordered as a complete master key system - the padlock offers the right variant for every requirement. As a particularly practical feature, keyed alike according to sample makes it possible to order additional container locks with the desired bitting. The #SZP version features an additional security card that reliably prevents unauthorised duplication of the keys. A copy is only possible on presentation of the card. Tested and approved

In combination with the 37RK/70HB100 padlock, the hasp is approved in the highest class B in accordance with VdS guideline 3503. This means that the above combinations of hasp and padlock offer additional protection against attacks on the container. If, for example, the bars are cut, the container lock remains securely in position and cannot simply be removed.

In addition, the combination of container lock and padlock is tested and approved in accordance with the Swedish SSF standard.

Technologies

- Additional securing of goods in containers
- Locking of the two-part construction with 37RK/70HB100 padlock
- Made from hardened steel
- Processed using a special welding process for even greater security
- All parts protected against corrosion by special coating

- 37RK/70: with ABUS Plus cylinder and code card
- Approved in accordance with VdS 3503 (Class B) and SSF 1051 (Class 4): This applies to ConHasp GRANIT™ 215/100 + 37RK/70HB100 padlocks

Operation and use

- Fits the most common transportation and storage containers
- Can be fitted to old and new containers
- Secure locking only in combination with a suitable padlock (here the GRANIT™ 37RK/70HB100)

Variants

- Bitting: keyed alike (gl.), keyed alike according to sample (gl. lt. Muster) and keyed to differ (vs.) padlocks available
- Security card: in the #SZP version (protected key profile), a security card for duplicating keys is included in the scope of delivery
- Also optionally available as master key systems (HS)
