LIGHTWEIGHT AND STRONG

Protect wooden doors securely with lightweight metal rosette.

If door fittings do not fit or do not visually blend into the overall appearance of your door, you can fall back on escutcheon plates. With this lightweight metal rosette, your wooden doors with a thickness of 60 millimetres can be reliably protected against breaking, break-in tools and drilling. The screws are also secured against drilling.

Technologies

- Two depths available
- Screws protected against drilling
- Cylinders should protrude no more than 3 mm
- Suitable for door thicknesses up to 60 mm

Operation and use

- For wooden doors
- Protruding EURO-Profile Cylinders should be protected with escutcheon plates

Variants

- Finishes: F1 (alu anodized), F2 (silver anodized)
