

SAFE FROM ALL SIDES

With door guard and reversible key: Make your doors with glass inserts more secure with this additional lock.

Your doors should always be reliable and secure. Even if glass inserts are installed. This additional door lock provides security for you and your family. This additional lock can be used if glass elements are installed in your door. It has a strong wall anchor by heavy duty dowels and withstands a pressure of one ton. The strong solid steel oval bolt protects your door from attempted break-ins and the door guard also allows you to open the door a crack wide, e.g. to receive post. The lock is locked and unlocked from the inside and outside with a reversible key.
