

LOUD ALARM

Additional window lock with alarm function and two claw bolting steel bolts.

Double is better. This also applies to the security of your windows. This additional security lock not only closes securely, it is also equipped with an additional alarm function. The two claw bolting steel bolts of this additional lock give it the ability to withstand a pressure of over one ton. In addition, an alarm function is installed that sounds at 110 decibels in the event of a break-in. The fuse is closed with a turning knob. It can be opened with a key. It is particularly suitable for wooden windows.
