E245

THE MOTOR PROTECTION SWITCH INTERLOCK E245 IS ONLY AVAILABLE FROM ABUS

It is the first on the market that can be used on all motor protection switch with an overall height of 45 millimetres.

And this is independent of which manufacturer the circuit breaker comes from. The E245 is placed on the motor protection switch. When the outer twist handle is operated, it creates the clamp, which is secured by a padlock. This way it sits firmly on the housing and prevents access to the motor protection switch.

Technologies

- The E245 is positioned on the motor protection switch, tightly clamped by means of the locking mechanism and secured with a padlock
- For all motor protection switches with a switch panel height of 45 mm

Operation and use

- For securing motor protection switches with a switch panel height of 45 mm in case of service

Tips

- Best used in combination with a LoTo tag
