**SECORIS®**

# SECURITY ACCORDING TO PLAN

The alarm system with EN Grade 2 certificate.

# SECURITY FOR OFFICE AND COMMERCIAL PROPERTIES

## SECURITY SINCE 1924

Security is the core promise of ABUS. Since 1924, we have been passionate about making life a little more secure. The history of ABUS began with the Iron Rock padlock. Today, we are one of the world's leading brands for mechanical and electronic security technologies.

## PROVEN, CERTIFIED, SECURE

For professional use in the office, practice, or company: ABUS Secoris is the reliable, easy-to-operate alarm system! Installed and maintained directly by a specialist – remotely and on site. ABUS Secoris is the wired, EN Grade 2 certified alarm system for offices and commercial properties. It is ABUS's most powerful alarm system for companies.

# SECURITY IN COMPANIES?

**ABUS SECORIS IS THE RIGHT CHOICE FOR YOU!**

Configure ABUS Secoris exactly as you wish. For up to 200 users or up to 200 individually identifiable detector groups, 50 BUS components and 20 security zones.

Up to 10 ABUS surveillance cameras can be controlled for the verification of events. ABUS Secoris is also compatible with ABUS access control systems.

**EN  
Level 2  
EN 50131-1**

## SOFTWARE PLATFORM

### SECORIS APP

With the ABUS Secoris app, you can conveniently operate the alarm system and view the status. In the case of an event, you will receive a push message.

### INTEGRATED WEB INTERFACE

Adding new users and assigning permissions. The intuitive menu interface makes it easy to operate the system.

### PORTAL IN THE CLOUD

Installers manage all systems via the portal in the ABUS Cloud. They have an overview of the service status of the systems, make remote diagnoses, install updates, and configure the system via remote maintenance.

### CONNECTION TO THE EMERGENCY CALL CENTRE

Fast alerting through direct connection to an emergency call centre. Optional redundancy via PSTN or 4G module.

# AN OVERVIEW OF THE HIGHLIGHTS

- Alarm system for reliable operation, precise alarming and flexible setup, optimal for professional protection of office and commercial properties, certified quality according to EN Grade 2
- Extensive protection for individual requirements with up to 200 individually identifiable detector groups and a total of 50 BUS components, flexible operation for 200 users in up to 20 security areas
- Convenient operation and alarming/disarming via keypad or app
- Compatible with ABUS access control systems
- Integration of up to 10 ABUS IP cameras
- Safe, fast alarming possible through direct connection to an emergency call centre

## FOR OFFICE, PRACTICE, AND BUSINESS

ABUS Secoris is a highly reliable and easy-to-use alarm system. As usual, ABUS provides a great overall package: quality, reliability and the best service for companies.

EN  
Level 2  
EN 50131-1

## EN GRADE 2 CERTIFICATION

Many commercial properties do not need just any alarm system. Insurance companies require EN Grade 2 certification for certain types of companies and premises.

Based on this certification, ABUS Secoris implements alarm functions for protection against burglary, fire, water damage and emergencies. In addition, a wide range of further security functions is available, such as the addition of electronic radio locking cylinders. This allows you to keep an eye on all access and movements in the building. And are protected from triggering a false alarm by entering a secured area.

# COMPREHENSIVE SECURITY

Full all-round protection in the event of burglary and glass breakage to alarming for fire, water damage and emergencies.

Flexibly expandable to 200 detector groups to effectively secure even larger buildings. At the same time, the system offers state-of-the-art security functions, such as the integration of up to 50 BUS components, digital ABUS locking systems, etc.

## OUTDOOR SIREN

The alarm siren with LED flash technology is a combination signal transmitter and thus a crucial component of the fully functioning alarm chain.

## SECORIS CONTROL PANEL

Alarm system for reliable operation, precise alarming and flexible setup, optimal for professional protection of office and commercial properties, certified quality according to EN Grade 2.

## VIDEO SURVEILLANCE

Up to 10 ABUS IP cameras can be controlled for the verification of events.

## KEYPAD

The building? Guaranteed safe. Simply and conveniently arm and disarm the panel via Access Code. Simply operate the alarm system when coming and going.

## MOTION DETECTOR PIR MW (PET)

Recognises people precisely: The pet-immune dual-wire motion detector combines detection with passive infrared (PIR) and microwave (MW) - for 2-fold protection against false alarms.

## MOTION DETECTOR PIR (PET)

The pet-immune wire motion detector monitors rooms using a passive infrared (PIR) sensor. It is also suitable for households with pets. Extra safe thanks to undercrawl protection.

## ACCESS CONTROL

Simple and flexible access management by person, door, date and time. This way you have control and proof of all building access. Also for sensitive areas such as server rooms, archives or vaults.

## INDOOR SIREN

The indoor siren is an acoustic signal generator. You can use the alarm siren LED that can be activated remotely to detect the status of the alarm centre (armed/disarmed).

## BUS-WIRE DETECTOR GROUP EXTENSION

With this module you expand your alarm system by 10 wired alarm detector groups in order to integrate additional detectors and components.

## SHOCK DETECTOR

The vibration detector reacts to structure-borne sound signals and vibrations. Vibrations that typically occur during burglary attempts are detected and reported to the alarm centre.

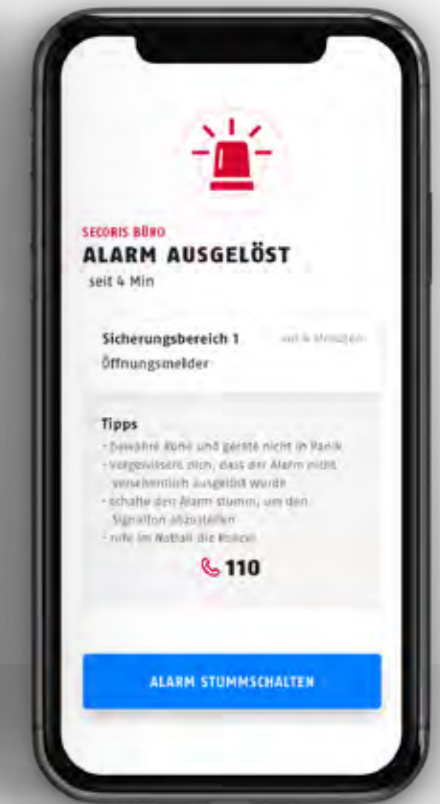

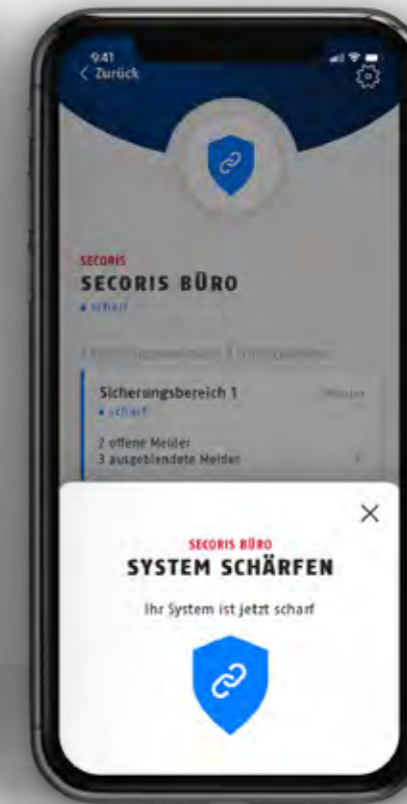

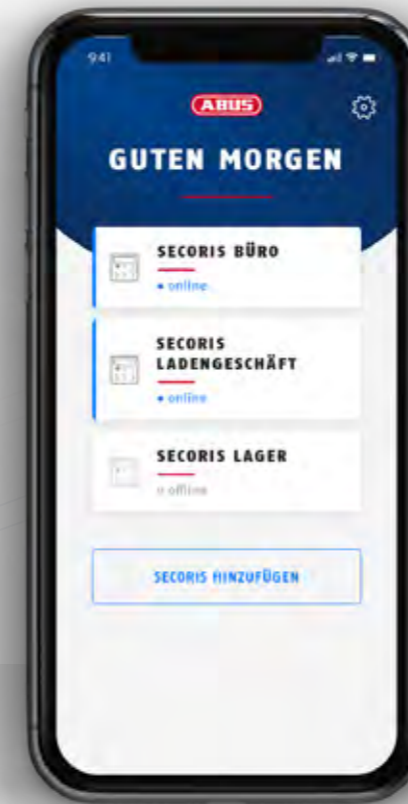

## ACOUSTIC GLASS BREAKAGE DETECTOR

Detects glass breakage by the sound: The acoustic glass breakage detector monitors glass surfaces and window fronts reliably and efficiently - and reports each break-in to the alarm centre.

# ALWAYS A SECURE BUILDING

The entire alarm system on the smartphone or tablet.

The ABUS Secoris alarm system can be operated via the Secoris app. Up to 200 app users can access the alarm system functions with individual authorisations. App security is ensured by app password, fingerprint or facial recognition.

## DISCOVER THE APP WITH EASE

Thanks to the onboarding assistant and in-app help right there for each function, the connection between the app and the alarm centre is effortless. This makes operating a pleasure.

## TOP OVERVIEW, SECURELY ARM THE SYSTEM

Each control panel can be selected directly as a tile in the overview screen. The detailed view shows important information at a glance: Status of the control panel and security areas, number of detector groups and status. The status is displayed in a clear colour code by means of a protective shield symbol, which is also used for instant arming by means of a safe touch gesture.

## REACT CORRECTLY IN THE EVENT OF AN ALARM

In the event of an alarm, the alarm view opens and shows the event, the triggered security area, detector group, and a recommendation for action. Authorised users can acknowledge the alarm in the app and reset the alarm system.

# YOUR COMPANY, YOUR DECISION

## Online administration via web interface

Thanks to the intuitive web interface, new users can be added easily. Not all employees should have access to all functions in all areas? No problem. You decide yourself who in your company receives which authorisations.

### UP TO 200 USERS

Not every employee uses the Secoris alarm system. For example, only give your department heads authorisation in the respective area.

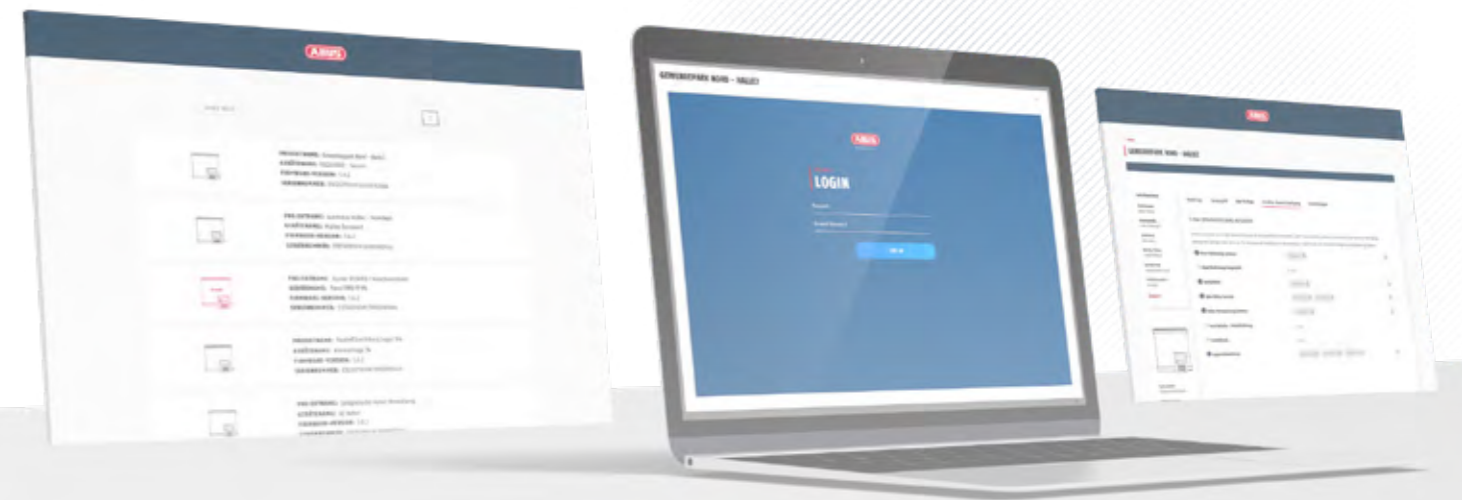

### MOVING WITHIN THE COMPANY

Are you restructuring your company? Teams and departments need to move within the building? No problem. You can simply change the permissions in the web interface.

### SCHEDULES

And if the system activation is forgotten? Use automatic schedules. In order to be absolutely certain that the ABUS Secoris was actually activated at the weekend, for example, automatic schedules can be set.

## NEXT LEVEL SERVICE

Perfect installation, top service - carefree with the ABUS Cloud

Via ABUS Cloud, the specialist company uses the Secoris portal for administration, remote diagnosis and maintenance of the system, subject to your consent. Whether service, update or troubleshooting: the expert has everything under control!

# PRODUCTS OVERVIEW

## CENTRAL & ALERTING

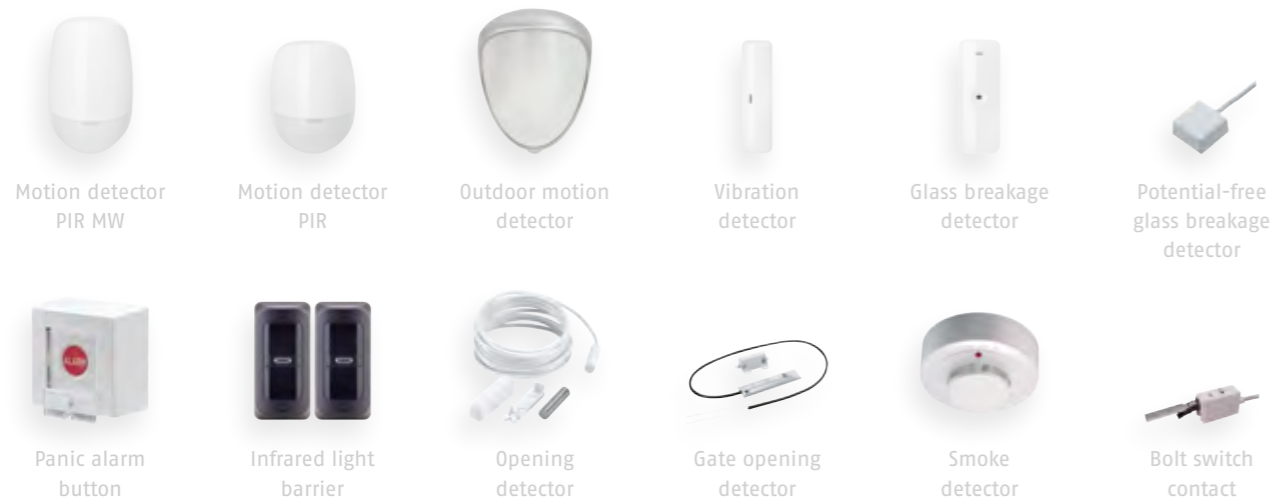

Alarm panel    BUS power supply    BUS wire detector group extension    Outdoor siren    Indoor siren    4-fold/8-fold relay board

## OPERATION

Keypad    AP key switch    Flush-mounted key switch

## DETECTORS

Motion detector PIR MW    Motion detector PIR    Outdoor motion detector    Vibration detector    Glass breakage detector    Potential-free glass breakage detector  
 Panic alarm button    Infrared light barrier    Opening detector    Gate opening detector    Smoke detector    Bolt switch contact

## ACCESSORIES

Surface-mounted screw distributor 5 & 12-pole    Surface-mounted soldering distributor 16- & 32-pole    Flush-mounted soldering distributor 19-pole    VdS accumulator    GSM antenna    Alarm cable
