ABUS - MADE IN GERMANY

When August Bremicker and his sons founded ABUS in 1924, they had a lot of experience with engineering and craftsmanship – as well as a very clear vision: They wanted to create products that protected human life and property. It was a far-sighted corporate goal – paired with an expectation for quality right from the start. It was the start of a continuous success story. The ABUS brand became a synonym for security world-wide.

HIGH-QUALITY MATERIALS

To be able to offer consistently high quality and security against every type of brutal and intelligent attack technique, we use the highest-quality materials at every price level. Complex hardening processes guarantee the best resistance in our materials. Our internal quality management check all materials before and during the production process to ensure every product has the high quality you demand.

THE KEY TO SUCCESS

At ABUS, we design and build the tools and machines used in the production of our products in-house. That bundles knowhow, guarantees jobs, and strengthens identification. Our own engineering and toolmaking department concentrates exclusively on the development of bicycle and motorcycle locks. This ensures that we meet the tough requirements you place on your bicycle or motorcycle lock every day.

ENSURING CONSISTENCY

In our own ABUS test laboratory, we routinely carry out tests and attacks on our products to ensure our products offer consistently high quality.

Among others we make sure our locks are resistant to:

- Ice spray attacks and freezing conditions at -40°C
- Twisting, pulling, hammering and sawing attacks with help of our manual or mechanical tests
- Rust by simulating highly corrosive weather conditions

APPROVALS

ABUS locks are tested and approved by independent testing institutions in a number of European countries. As every test lab use different tools, techniques and machines to test both security and quality we are very proud of the high number of different approvals given to ABUS products. If a lock can pass the varying test requirements in many different countries you can be sure it is of the highest possible quality and security.

The following seals of approval confirm the outstanding security of ABUS cycle locks:

ONE KEY™ SIMPLE. INDIVIDUAL.

HAVE CUSTOM BIKE LOCKS MADE - OPERATE EVERYTHING WITH JUST ONE KEY!

A primary lock, a frame lock, a padlock, and even a battery lock for e-bikes - if you want to secure your bike properly, you need a lot of locks. That is why we at ABUS, with the ONE KEY system, offer the ability to produce locks for your customers in such a way that they can all be operated with one key. No mess, no looking for keys.

HOW ONE KEY™ WORKS

It's quite simple. Each ABUS lock has an individual key code with which spare keys or matching "keyed alike" locks can be made - even years after purchase. All that matters is that the locks from ABUS have the same type of cylinder installed.

HERE'S HOW IT WORKS

The order is conveniently placed via the Partner-Portal.

1. Read key code from code card

2. Choose suitable products at your retailer

3. 1 week to manufacture your custom product

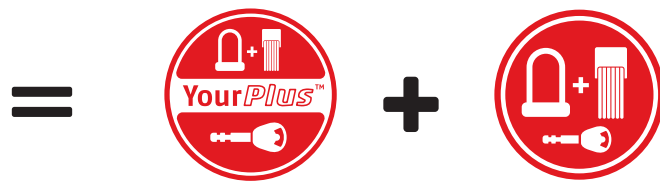

4. Pick up at retailer or ship to home

FAMILIAR FACE – NEW DESIGN

As a manufacturer of cylinders and bicycle locks, ABUS has the unique opportunity on the market to manufacture custom locks so that they can all be operated with one key – or “keyed alike”. It is important that the locks be compatible with each other for this purpose.

So far we have marked our products and campaigns with these icons:

With YourPlus™, we have combined all locks that have a Plus cylinder.

This icon currently indicates that this lock can be keyed alike.

FROM NOW ON, WE'RE BRINGING EVERYTHING TOGETHER UNDER ONE KEY™ – A CLEAR PROMISE FOR MORE CONVENIENCE.

THE ABUS LEVEL SYSTEM

Finding the right lock for your customer requires a few questions that can help in the selection process. A lock must not only be secure, it must also suit the user.

The questions below can help you figure out what your customer is looking for:

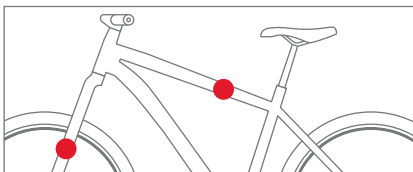

In the sales conversation, you get the best feel for your customer and a sense for what they value.

Many questions are rather soft factors and have an influence on the choice of the lock, but not so much on the choice of the appropriate security level.

The most important factors in determining the level of protection required are the bicycle value, location and length of time the bike is left.

For this, we recommend the following reference:

	Rural region 	Suburban 	Urban 
Quickstop	2 - 4	7 - 10	13 - 15
Few hours	5 - 6	10 - 13	13 - 15
All day	6 - 7	13 - 15	15
Overnight	7 - 10	15	15

Lock your bike in illuminated and well frequented areas.

Secure you bike to an immovable object and lock both, frame and front wheel.

Keep the lock as high as possible and pass it through the frame as much as you can. This makes it harder to attack.

ABUS OEM

STRONG SERVICE PARTNER, RELIABLE SUPPLIER ABUS AS OEM PARTNER – YOUR FIRST CHOICE

In the bicycle market, the factors of success are added value, differentiation, flexibility, availability, fast service and high capacity. Suppliers that work with bicycle manufacturers have to meet the corresponding requirements. ABUS meets them.

As a globally experienced specialist in bicycle security, we offer you the best possible support and a high level of reliability. For years, ABUS has been a synonym for security, and has earned a leading position in the bicycle accessory market.

Quality „Made in Germany“ and „Just in time“ deliveries: concentrating on these core competences has made us an important partner for many bicycle manufacturers worldwide. We are also a strong partner on the OEM market, offering a wide selection of frame locks, integrated security solutions, and many individual products. Among others, we offer keyed alike locks and battery cylinders for e-bikes.

Allow us to take advantage of mutual synergy and implement it to our shared success!

Our OEM team looks forward to hearing from you at: oem@abus.de

We hope to continue our good cooperation with leading bicycle manufacturers!

CUSTOM SECURITY

Custom security solutions are not just a trend, but also a very convenient way for cyclists to secure their beloved bicycles. Take advantage of our more than 90 years of experience, and set yourself apart from the masses with a customized security solution.

SUCCESSFUL SHOP DESIGN

How you design your shop is a significant part of your economic success from a psychological perspective. We help you in the process of making your showroom a customer-friendly area. By doing so, you do not only ensure successful sales today, but also in the future. Because your customers will always come back.

1. STAND OUT

Make your business stand out from the crowd and ensure that your customers feel comfortable in your shop with a warm atmosphere.

2. QUALITY WINS

Many years of experience, carefully thought out development processes and high-quality materials are significant for the products themselves as well as for the presentation aids. ABUS has the complete package.

3. BE REMEMBERED

Create experiences, that go beyond the simple provision and sale of goods. Touch, try out - go on a discovery tour. This is your advantage especially compared to online businesses.

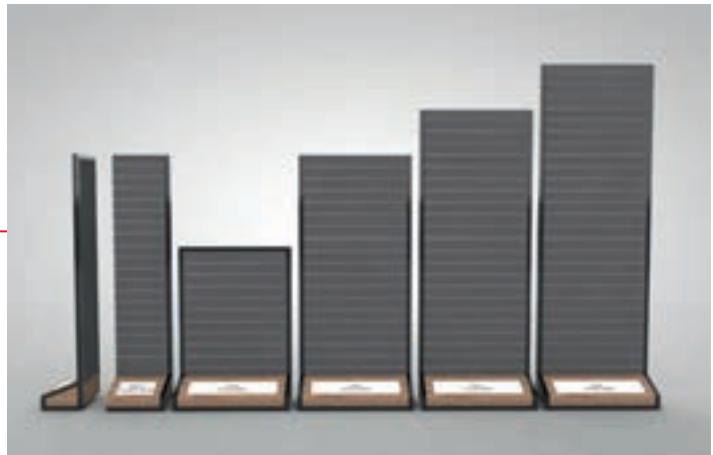

WE SUPPORT YOU IN SELLING OUR PRODUCTS

Your needs are very important to us. We support you in the process of creating experiences and transforming the purchase into an event, which you like to think back to - and that you want to repeat.

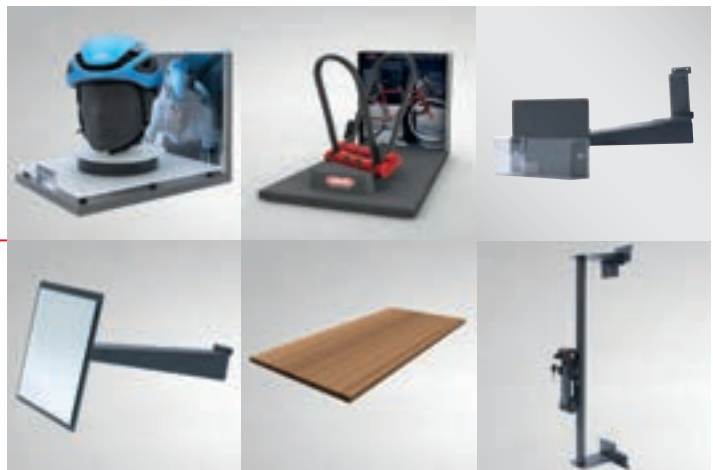

MODULAR CONSTRUCTION:

Our new system is designed in such a way that it can be assembled in a modular way from various elements. You can influence the design.

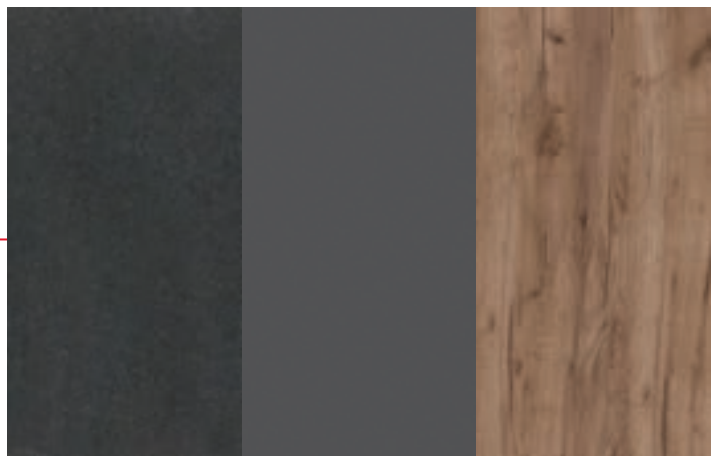

NUMEROUS ADD-ONS:

Attract attention, help to categorize and inform - combine the tools just the way you need them.

MODERN DESIGN:

Metal and wood elements combined in an understated „handmade“ look - won't disrupt the existing design of your shop.
