

Carbon Monoxide Detector C0WM510

WARNED IN GOOD TIME

Carbon monoxide alarm for use in the home.

When carbon monoxide leaks, every second counts. Rely on this CO alarm so that you and your family are warned in good time in the event of an emergency. If this detects the escape of the gas, an alarm sounds at 85 decibels. The detection area of the warning detector is 62 square metres. It is recommended to use the unit in rooms where there is a fireplace, tiled stove or similar. The sensor inside the unit has a lifespan of around ten years.

Technologies

- 10 year sensor lifespan (electrochemical)
- Display to indicate the CO concentration
