

# Day/night switch box for IR Illuminator

## MEGA LED XL

Art.-Nr. TV6857

Seite 1 von 1

The day/night switchbox is an accessory for the discreet and semi-discreet IR illuminators MEGA LED XL (TV6855, TV6856, TV6898, TV6899). It measures the light intensity in the camera's vicinity and switches on the IR illuminator if light intensity is below 10 lux. Thus, the IR illuminators are only activated if the available light is not sufficient for the camera. This helps to save power and extends the service life of the illuminator.

### Technologies

- Light sensor activation of the MEGA LED XL below 10 lux

### Technical data - Day/night switch box for IR Illuminator MEGA LED XL

DC voltage supply	12 V
Dimensions	(W x H x D) 105 x 58 x 35 mm
Fastening	M6 thread
Height	58 mm
IP protection class	66
Length	35 mm
Max. operating temperature	40 °C
Min. operating temperature	-30 °C
Net weight	2 kg
Power consumption	8.000 mA
Width	105 mm
