pAll in 4K - from the camera to the monitor
The 28" LED monitor displays 4K Ultra HD pictures in 16:9 format. This makes it ideally suited for displaying 4K surveillance pictures./ppDetailed surveillance pictures in 4K
Thanks to a rapid reaction time of just 5 ms, surveillance pictures are displayed clearly and continuously. Quick movements on the screen are shown without any distortions, flickering or ghost images. You see detailed, vivid pictures in 4K Ultra HD quality./ppVersatile connections
The connections ensure a high level of flexibility when connecting the monitor to a recorder or PC. Thanks to the HDMI connection, the monitor is optimally suited to displaying images in Ultra HD. The VGA and DVI connections provide additional options, making the monitor a suitable component for versatile surveillance systems, and it is further equipped with an integrated speaker and an audio input and output./ppEnergy efficiency
The efficient LED display ensures very low power consumption and is especially advantageous in long-term surveillance./ppEasy installation
VESA standard brackets can be used for mounting. This makes installation fast and easy./p
