

SFP Module Singlemode

Art.-Nr. ITAC10260

Seite 1 von 2

For promising networking of professional security surveillance systems.
The standardised SFP module is used to connect duplex single-mode optical fibres.

It is compatible with all standardised SFP slots and is required for use of the LWL port in our switches and the media converter.

Technologies

- SFP modules for LC plugs according to SFF-8472 standard
- Supports hot-plug
- Supports single-mode optical fibres
- Transmission distance of up to 20 km
- 1310 nm FP laser
- Complies with the IEC-60825 laser safety standard

Technical data - SFP Module Singlemode

Application purpose	General surveillance
DC power supply	3.15V-3.45V V
Dimensions	(LxWxH) 56 x 14 x 6 mm
Fiber optic cable type	Single mode 9/125um
Fiber optic connection	LC
Height	6 mm
Length	56 mm
Max. Air humidity	95 %
Max. Operating temperature	70 °C
Min. operating temperature	0 °C
Net weight	0.017 kg
Optical wavelength	1,310
PSTI conformity needed	No
Power consumption	1 W

Technical data - SFP Module Singlemode

Product group	Accessories
Transmission distance	20,000 m
WEEE group	09
width	14 mm
