

CORNER BRACKET FOR THE CAMERA CEILING MOUNT

The corner bracket is a special bracket that can be used in combination with the ceiling mount (art. no. TVAC31205). It provides an easy way to install PTZ dome cameras in a corner and is also compatible with the TVAC31245 installation box.

With its compact dimensions (L x W x H) of 250 x 126 x 105mm, the bracket fits perfectly in any corner for installing the ceiling mount and dome camera. The corner bracket has a stylish white design so that it perfectly complements the surveillance components to be mounted with it. It offers a reliable and secure solution for easy installation of the camera with ceiling mount in a corner.

The bracket is an optional accessory for the TVAC31205 ceiling mount or for dome cameras such as the IPCS84530 and IPCS84531 (and identical models).
