

A carrier. A base. Many possibilities.

The new, modular lock carrier solution ABUS ML-BordoMount combines the simplicity of magnetic force with the security of a fixed mechanical connection.

The lock carrier engages automatically as soon as it is held on the frame via the FIDLOCK TWIST bike base. By pressing the locking lever integrated in the carrier, the ML-BordoMount is firmly connected to the wheel.

So you can enjoy complete flexibility at all times: Use the TWIST bike base for your water bottle on a sporty ride and use your secure BORDO lock for the daily cycle to the office.

Operation and use

- For easy transportation of the BORDO 6000K/90, 6000C/90 or the 6000KA/90
- Simple and super-fast magnetic attachment to the Fidlock TWIST bike base
- Does not require much space, as the lock can be removed from the front
- The BORDO 6000K/90 and 6000C/90 are also available individually without brackets

Technical data - Bracket SH FL 6000/90 BORDO / MONKEYLINK

Weight	160 g
