Illuminated info module for door intercom

TOTAL MODULAR: THE VIDEO INTERCOM SYSTEM

See people in front of the door, talk to them, open the door. Easy to install, modularly adaptable to any building - and the individual wishes of the users.

Welcome home - with ModuVis
The info module serves as a backlit bell or name plate or to display the house number (in conjunction with ModuVis video module and any other modules). This allows for an individually attractive design of the entrance area, e.g. for a private home.

Easy installation
The info module is simply connected to the video module and is supplied with power via it. In night mode, the backlight is automatically activated. Depending on the mounting frame used, the module is mounted on or under the plaster.

Totally modular, extensively expandable
A clear advantage: depending on the number of flats or living areas and local requirements, modules are simply added to the system. Thus, in addition to other info modules, numeric keyboards or bell button modules for up to 49 residential parties are possible. A ModuVis touch monitor is integrated for operation in each party.

Technologies

- Illuminated info module for ModuVis door intercom system
- Ideal as a name tag or house number display
- Suitable for surface-mounted or flush-mounted frames
- Several modules can be integrated into one ModuVis system
