

CUSTOM SECURITY SOLUTION

Zolit is precisely tailored to suit your personal requirements,

providing the chance to assemble your very own customised security solution - from the special features right down to the type of cylinder and finish. The Zolit system can be expanded at any time, giving you the flexibility to make changes at a later stage. The fact that the lock cylinders are developed and produced in Germany guarantees the best possible quality and a long product service life.

Technologies

- Strong, multi-paracentric key made of wear-resistant nickel silver
- Patent: Patent protection until 2034
- Locking system with 6 tumblers and 1 tumbler level
- Copy protection: Intop system for checking locking authorisation inside the cylinder and on the key

Variants
