

KEEP AN EYE ON EVERYTHING

Always know exactly who is at your front door. The digital door viewer makes this possible.

0.3 megapixel camera with active pixel sensor, a 105 degree angle of view. The DTS2814 replaces a conventional door viewer with modern technology. At the touch of a button, you can see on the display in no time at all who has rung your doorbell. This makes it difficult for tricksters. Senior citizens in particular often become their victims. But the crystal-clear picture of the DTS2814 enables older people and people who wear glasses in particular to look out safely. The unit is suitable for door panel thicknesses from 38 to 110 millimetres.

Technologies

- Approx. 2,000 screen activities per set of batteries
- 2.8" large TFT display
- 0.3 megapixel CMOS sensor
- 105° viewing angle
- Screen response time < 0.5 seconds
- High-quality branded batteries included, 4 x AAA alkaline (standard)
- Suitable for door thicknesses between 38 - 110 mm
- Suitable for bore diameters of 14 - 22 mm

Operation and use

- As a substitute for conventional door viewers or as original equipment in interior doors
- 2.8" TFT display for a bright and clear image, even in low light conditions (e.g. stairwell)
- Ideal for people with disabilities (short stature, wheelchair users) persons wearing glasses and children
- Also ideal for hotels, guesthouses, holiday homes, motels, etc.

Variants

- DTS2814rec: with recording, infrared night vision and door bell function
