Diskus® 24/70

TRUST THE ORIGINAL

Our padlock Diskus® 24/70 has proven itself especially in adverse weather conditions.

The round shape with narrow stirrup opening and the welding seam ensure solid safety! The Diskus® 24/70 padlock protects your valuables that you store in trucks, vans, cellars or behind factory gates, for example. The lock is made of stainless steel on the inside and outside, the shackle is made of special hardened steel, which makes it particularly tamper-proof. The seam that holds the two stainless steel shells together is also hand-welded on every Diskus® 24/70 that leaves our production facility in Germany. This means that the two halves cannot be easily broken apart and the Diskus® secures your valuables and objects very well. Two keys are supplied with the product.

Technologies

- Round shape plus narrow shackle opening makes it difficult to access with heavy-duty tools
- Shackle made from hardened alloy steel
- Ideally used with ABUS Diskus® Hasp 140: virtually impossible to attack shackle
- Additional protection against sawing
- Sophisticated welded seam for highest break resistance
- Precision pin tumbler cylinder
- Made in Germany
- 2 keys

Operation and use

- To secure valuables/goods at a medium risk of theft
