SECURE CONTAINER

The security value of the hasp should always be precisely matched to the respective padlock, because the two security products of hasp and padlock form a symbiosis in which the weakest link becomes extremely relevant to security.

ABUS offers a wide range of security latches at different security levels. You can recognise these hasps, for example, by concealed screws. In addition, hardened steel eyelets for the padlock shackle are encapsulated inside the hasp and thus provide optimum protection against break-in attacks.

Technologies

- Additional security device for containers
- Locking of multi-part construction via internal padlock with exchangeable 10/30 euro profile half cylinder
- Extremely resistant steel
- All parts corrosion protected
- Assembly in 60 seconds
- One hand operation
- SP approval: Certified according to SSF 1051 class 5 (Approval with ABUS Vitess 4000 V4L452 10/30 profile half cylinder only)

Operation and use

- High security hasp for container doors
- Ideal for use on containers
- Fits the most common transportation and storage containers
- Fits the most common containers
