

Chain 12KS120 Black Loop for 8008

Seite 1 von 2

Technologies

- 12 mm strong loop chain with fabric sleeve to prevent damage to the motorbike's paintwork
- The chain, the 16 mm bolt, the lock body as well as supporting elements of the locking mechanism are made of special hardened steel
- Alarm function on basis of the ABUS 3D detection system that means, that every movement is detected
- Alarm at a volume of at least 100 dB for 15 seconds, followed by automatic reactivation
- Lock can be transported in locked condition without activated detection system thanks to automatic brake disc recognition system
- Different acoustic signals inform about battery- and activation status
- ABUS XPlus cylinder for highest protection against manipulations, e.g. picking
- Two keys are supplied with the lock
- ABUS Code Card for additional or replacement keys
- One CR2 Battery for the alarm function is included

Operation and use

- Very Good protection at high theft risk
- Recommended for securing valuable motorbikes

Tips

- This lock can be ordered keyed alike to other locks. This means several locks would match one key, respectively key code
- Chain lock combinations are a very good solution for locking a motorbike to a fixed object
- The loop chain permits a very efficient use of the chain length
- Very handy use because only one end of the chain must be locked
- Two in one lock that means that the brake disc lock can also be used without the chain
- The chain has a special end link and can only be used in combination with the Detecto 8008 brake disc lock
- Please note that the chain combination does not necessarily fit on the same brake discs like the lock alone
- To limit the possibilities of brutal attacks it is recommendable to avoid that the chain lays on or hangs close to the ground
