

Heat and smoke

Our RWM300 not only reports smoke, but also excessive heat.

Especially in kitchens, rooms with open kitchen areas and the like, our ABUS RWM300 is a sensible purchase: The sensor inside constantly measures the temperature and reports whether, for example, the pan or the toaster have caught fire. In the event of a fire with only a small amount of smoke, the smoke alarm also sounds a loud alarm. The unit is certified by the KRIWAN test centre. It is mounted on the ceiling by means of an adhesive strip. The battery has a service life of up to twelve years.

Technologies

- Made in Germany
- Alert for smoke + heat
- 3V lithium battery, solid-state, 12-year battery life
- Dimensions: 10 cm diameter, 4,0 cm height
