SAFETY FOR THE TINIEST TOTS

A helmet is essential, even for little ones riding in a child seat. The Smooty 2.0 is therefore especially aimed at the youngest road users.

The Smooty 2.0 is a helmet specially designed for toddlers who still take their bike tours as co-drivers in a child seat. Because safety on the road is most important for youngest cyclists.

Its ergonomics are specially adapted to this special situation. The Smooty 2.0 has a flat back that allows your child to sit straight and comfortably in the child seat. This is not only more comfortable on long tours, the upright sitting position also protects the neck and spine and is considered particularly safe.

Technologies

- Reflector Sticker: for better visibility in the dark
- Bug Mesh: keeps flies and other bugs off your head without messing with the helmet's ventilation
- Zoom™ Spin adjustment system: rotary wheel at the back of the head for individual adjustment of the helmet to the head size
- Flap Divider™: strap divider for individual adjustment of the straps below the ears – with clamp fastener to fix the set position
- Comfort Pads: soft padded inserts for optimum comfort, attached to the helmet with Velcro
- Removable, washable pads: can be removed and washed by hand or replaced if necessary
- Push-in buckle: for safe and practical handling, the straps are fitted with a classic chin lock (three-pronged connection) for opening and closing

Smooty 2.0 blue space S
