

# Ear Pads HYP-E

## COMFORT UPGRADE

Are you out and about on your bike in all weathers? Then our EarPads for the HYP-E helmet model are the ideal companions for you. They protect your ears from wind, rain and cold and keep them nice and warm.

The ear muffs integrate perfectly into the strap guide of your helmet and do not slip. You can easily attach them to the bottom edge and take them back off when you no longer need them. A reflective application on the outside of the pads increases your visibility in poor visibility conditions. Thanks to the special fabric structure, you can hear ambient noise even with EarPads, making you safe when travelling in traffic.
