STRONG PROTECTION FOR YOUR EYES

The full visor protects the eyes and face over a large area from liquids, chips and other objects as well as from weather influences such as rain and wind.

Wearing our full visor prevents injuries and accidents at work. A large polycarbonate lens protects your eyes and face as well as possible from dangerous foreign objects. The full visor from ABUS is equipped with a reinforced frame to make it particularly impact-resistant. A full visor is recommended as part of the personal protective equipment especially for heavy construction and assembly work and in forestry.

At the same time, the anti-fog panoramic window offers an optimum field of vision for the work to be carried out. Visibility always remains clear, even in difficult conditions and extreme temperatures.

The full visor can be easily attached to or removed from the ABUS safety helmet using adapters (included in the scope of delivery). It is height-adjustable and therefore offers excellent freedom of movement.

Technologies

- Robust material: the polycarbonate lens offers robust eye coverage and comprehensive protection, scratch-resistant to external influences and abrasion-resistant, high impact resistance even at extreme temperatures
- Clear view: The visor is permanently fog-free on the inside and has 99.99 % UV protection
- Effective lens design: Wide-angle lens for optimum protection and clear vision, full visor can be worn over prescription glasses, reinforced frame to protect against debris

Clear full visor Scator(-E)

Seite 2 von 2

- Optimum fit: Individual height adjustability and maximum freedom of movement
- Modularity: Full visor and ABUS earmuffs can be worn simultaneously thanks to separate slots and are compatible with each other
- Practical: Easy lens change thanks to adapter with push button
- Optical class 1
- CE ISO 16321-1:2021

Operation and use

- Protection against mechanical hazards such as pointed objects, impacts or foreign bodies such as splinters and dust
- Protection from optical hazards such as UV light radiation
- Suitable for ABUS safety helmets
- The matching visor adapters are included in the scope of delivery and do not need to be ordered separately.
- Use cases include industry and manufacturing, building and construction, power generation and supply, agriculture and horticulture, road construction and civil engineering, forestry and wood processing

Variants

- Clear PC lens
