GRANIT™ Detecto XPlus™ 8077 2.0 yellow

SECURITY WITH PRE-ALARM

The ABUS disc brake lock GRANIT™ Detecto XPlus 8077 2.0 sets standards in terms of quality, protection and convenience.

An intelligent pre-alarm indicates movements on the lock and is silenced again in the event of a false alarm. If the lock continues to be attacked, an alarm sounds at a volume of at least 100 dB.

Thanks to 3D Position Detection, the GRANIT™ Detecto XPlus 8077 2.0 reliably recognises movements on the lock and first triggers the intelligent pre-alarm, which stops after seven signal tones. Only after this and in the event of further movements does the 100 dB full alarm sound for 15 seconds. In addition, the automatic brake disc detection system knows exactly when the lock for securing the bike is on the disc or not. This means the GRANIT™ Detecto XPlus 8077 2.0 can be conveniently transported closed without triggering the alarm function. LEDs in different colours provide information about the activity and battery status at a glance.

The necessary material strength is provided by the special hardened steel from which the locking bolt, housing and structural parts of the locking mechanism are made. The installed ABUS XPlus cylinder has been specially optimised for protection against tampering, e.g. picking attacks.

Technologies

- The 13.5 mm locking bolt, housing and structural parts of the locking mechanism are made of specially hardened steel
- 3D Position Detection – recognises vibrations and the smallest movements in all three dimensions and triggers the alarm function
- If the lock is moved, an intelligent pre-alarm with seven signal tones sounds first – if the lock continues to be attacked or moved, the full alarm, which is at least 100 dB loud, then sounds for 15 seconds
- After the pre-alarm or full alarm, the lock is automatically armed
- Thanks to the automatic brake disc detection system, the lock can be transported when closed without activating

GRANIT™ Detecto XPlus™ 8077 2.0 yellow

the alarm function
- Acoustic and visual signals (multi-coloured LEDs) indicate the battery and activity status
- ABUS XPlus cylinder for extremely high protection against tampering, e.g. picking
- Two keys included
- Two AAA standard batteries included in the scope of delivery

Operation and use

- Very good protection for high theft risk
- Recommended for securing high-value motorbikes

Tips

- You can order this lock keyed alike with other locks. This means that several locks match one key or one key code
- Disc brake locks are the most compact category of motorbike locks and are therefore easy to transport
- To increase security when parking for longer periods, it is advisable to also secure the motorbike to a fixed object
- Thanks to the 3D Detection System, the motorcyclist is warned when the motorbike is moved from the stand if the lock is still on the brake disc
- When armed, the red flashing light has an additional deterrent effect

Technical data - GRANIT™ Detecto XPlus™ 8077 2.0 yellow

Brake disc lock bolt	13,5 mm
Brake disc lock inner clearance length	48 mm
Locking type	key
Weight	940 g
alarm function	Yes
color of facets	yellow
design color	yellow
EAN	4003318978043
